

# hi tile™

**The innovative  
flooring system**

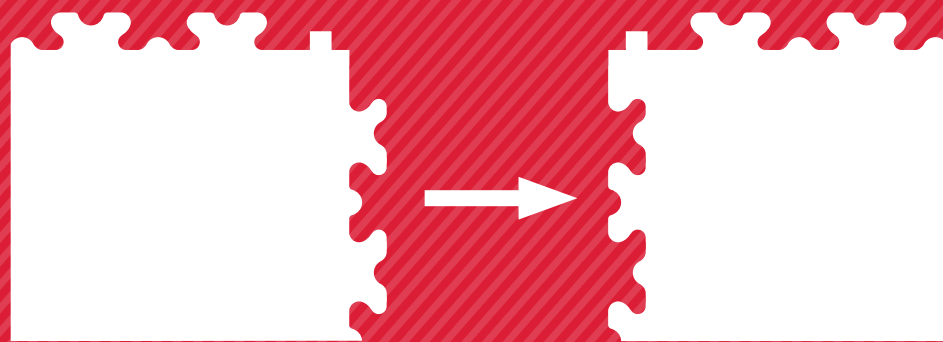

## Why Hi-Tile is such an effective solution

- ✓ Electrostatic resistance
- ✓ Robot friendly
- ✓ Range of colours
- ✓ Health & safety compliant
- ✓ Anti-slip surface
- ✓ Minimal subfloor preparation required
- ✓ Quick to install
- ✓ Versatile application
- ✓ Extremely durable
- ✓ Can be used immediately
- ✓ Made of 100% recyclable PVC
- ✓ Acoustic benefits
- ✓ Moisture resistant
- ✓ 10 year wearability warranty
- ✓ Easy to clean and maintain
- ✓ Cost effective

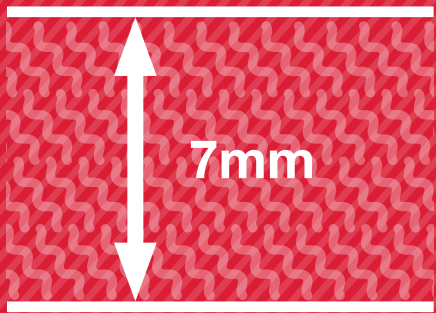

# The detail

515mm x 515mm in size and fits together with interlocking dovetail joints and neat edging

Made of 100% recyclable PVC - a brilliant solution for those looking for a more sustainable flooring option

7mm thick with a textured finish and R10 slip rating – perfect for use in warehouse environments

Hi-Tile has a 10-year wearability warranty

Electrostatic resistance with electrostatic behaviour at 2kv – a requirement of most warehouse robot solutions – complying with IEC61340

Tested with a global robot provider in China – with 68,000 cycles on 150KG payload completed

# Quick and easy installation

1

## Neat & tidy

515mm x 515mm in size and fits together with interlocking dovetail joints and neat edging strips making them very quick to install

2

## Foot & Wheel

Edging strips not only provide a neat finish but with a ramped design they also allow for safe and easy access for foot and wheel traffic. Edging strips can be provided in contrasting colours for easier visibility

3

## Minimal Prep

Hi-Tile can be installed over uneven or damp slabs with minimal subfloor preparation required so...

4

## Install & Go

...Hi-Tile can be used immediately meaning little to no disruption and minimum down-time for operations unlike other floor products that require up to 48 hours to set/dry, once installed

5

## Durable & Easy Fix

Extremely durable preventing indentations from repeat use on the same routes. If needed, a single tile can be lifted and replaced – with minimal cost or disruption

## A practical solution

### Colours

- A range of colours for aesthetics, zoning designated areas for certain processes or health and safety reasons

### Printing

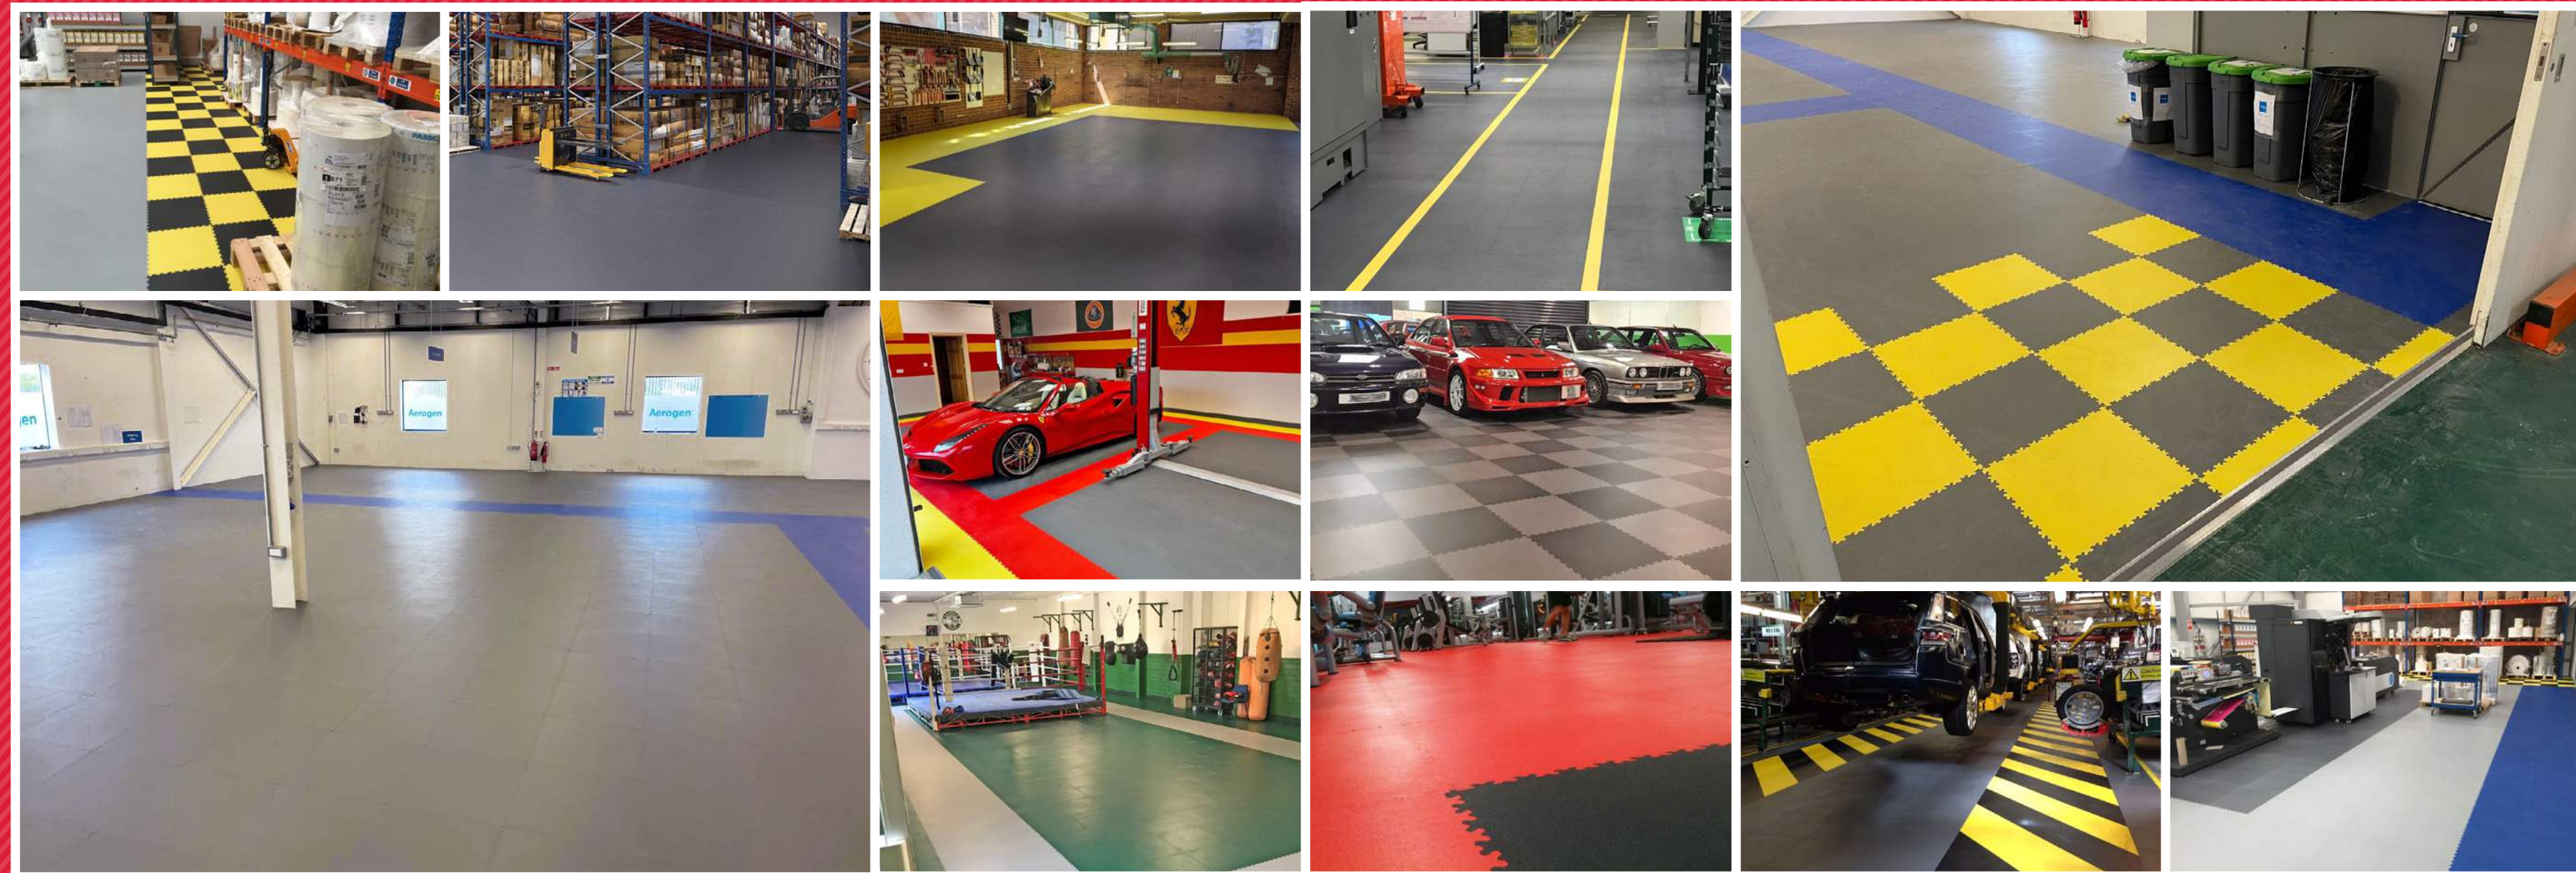

- Tiles can be branded

# Completed projects

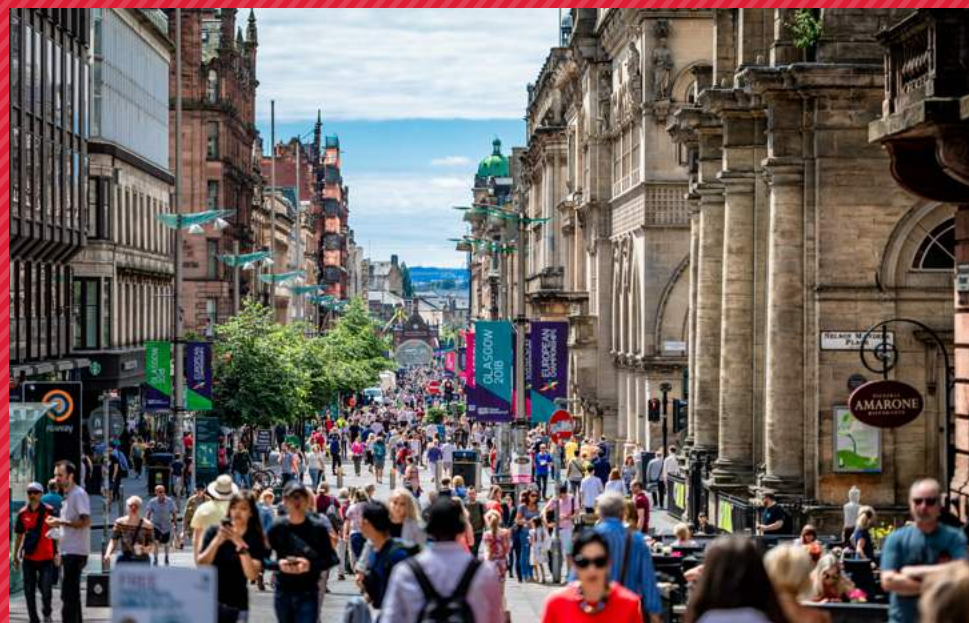

## Projects large or small

- We have completed projects ranging from 200 to 9000m<sup>2</sup> for warehousing, production, automation and robotics environments.

# Clients

High street retailers

Supermarkets

3PLs

Specialist logistics firms

E-commerce wholesalers

Manufacturing

## Hi-Tile in the press

**“The tile option is a great way to create a perfect floor very, very quickly”**

Simon Houghton, Director of Sales UK&I and Middle East - Geek Plus Robotics

***Warehouse  
& Logistics News***

**“Hi-Tile revolutionises flooring for warehouse robots”**

**“An innovative robot-ready flooring system to meet the demands of booming global logistics automation sector was launched at IWLEX on 23 May 2023”**
